CHILD NUTRITION AND PHYSICAL FITNESS PROGRAM

The Fort Gibson Board of Education recognizes that childhood obesity has reached epidemic levels throughout the country. Overweight children are at a higher risk for developing severe long-term health problems, and overweight children are affected by discrimination, psychological stress, and low self-esteem. However, research indicates that obesity and subsequent diseases are largely preventable through diet and regular physical activity. Research also indicates that becoming physically active and maintaining a regular physical activity program significantly reduces the risk of some obesity and some cancers, diabetes, and other chronic diseases.

Children who eat well-balanced meals and are healthy are more likely to learn in the classroom. The board supports increased emphasis on nutrition as well as physical activity at all grade levels to enhance the well-being of our district's youth. Therefore, it is the policy of the board to:

1. Provide students access to nutritious food;
2. Provide opportunities for physical activity and developmentally appropriate exercise; and
3. Provide accurate information related to these topics.

It is the intent of the board of education that parents, students, child nutrition employees, teachers of physical education, school health professionals, and the general public participate in the development, implementation, and periodic review and updating of this policy. It is expected that the school district's Healthy and Fit Kids Advisory Committee will participate in the process and assist the referenced individuals in preparing written recommendations to the administration and the board to adopt as a part of the school district's local school wellness policy. Specific information regarding these recommendations and the wellness policy are as follows:

**Wellness Policy**

Research shows students perform better academically when they have access to good nutrition and physical health opportunities before, after, and during school hours. The District establishes goals to ensure opportunities for students to practice healthy nutrition and physical activity throughout the school day. These specific goals include:

- Students in the District have access to healthy foods at school in accordance with federal and state nutrition standards;
- Students receive quality nutrition education that helps them develop lifelong healthy eating behaviors;
Students have opportunities to be physically active before, during, and after school; 
Schools engage in nutrition and physical activity promotion and other activities that promote student wellness; 
School staff are encouraged and supported to practice healthy nutrition and physical activity behaviors in and out of school; 
The community is engaged in supporting the work of the District in creating continuity between school and other settings for the students and staff to practice lifelong healthy habits; and 
The District establishes and maintains an infrastructure for management, oversight, implementation, communication about and monitoring of the policy and its established goals and objectives.

The policy applies to all students in all schools of the District. The board encourages all staff to serve as role models for healthy eating and appropriate physical activity.

District Wellness Committee Membership and Leadership

The district's wellness program will be coordinated by the District School Nurse. The District School Nurse will annually designate one (1) individual at each school site to be a site level liaison for the district's program and will publicize this information on the district's website, in school newsletters and by other means as he/she determines appropriate. Individual sites will publicize the name and contact information for their site liaison in school newsletters, as a part of routine parent updates, and through other appropriate methods.

Although the district's wellness program is coordinated by the District School Nurse, the program will be based on the work of the district's wellness committee. The committee will meet annually during the school year for the purpose of reviewing existing wellness activities, brainstorming new activities, reviewing and assessing the district's wellness policies and procedures, and related actions.

Membership in the committee will be open to interested parents, students, health care providers, social service workers and school representatives. The committee will include, minimally, the child nutrition director, a PE teacher, a school administrator and all site liaisons.

The wellness committee will also focus on providing wellness resources and strategies to teachers. The committee will make recommendations regarding professional development related to health, wellness, integrating kinesthetic learning and the overall connection between wellness and learning.

Assessment Planning and Reporting

The District School Nurse is responsible for conducting a district assessment. Once the assessment is completed, the committee will develop and maintain a plan to implement and manage the district's wellness program. The district's plan will be specific for each site (although the site plans may be substantially similar) and delineate the roles, responsibilities, actions and timelines for wellness activities. It will also include specific goals and objectives for nutrition
standards for all foods and beverages available on campus, outside food/beverage marketing, nutrition promotion and education, physical activity and education and other wellness activities. The plan will be regularly assessed, reviewed and updated in light of district needs, emerging research and to ensure compliance with the latest local, state, and federal standards.

The District School Nurse will prepare a triennial progress assessment for the board. This assessment will include information such as the extent to which individual schools are in compliance with the policy, how the district's program compares with federal standards and a description of the overall progress in attaining the district's goals.

A copy of all assessments, plans and progress reports will be available through the District School Nurse. The District School Nurse will also maintain documentation demonstrating efforts to involve non-employees in the committee, minutes from the committee meetings, notes regarding wellness activities conducted, and information regarding how this information was made available to families and community members.

Open Communication

The District School Nurse and site liaisons are expected to make an effort to involve all district families and interested community members in the district's wellness initiatives. This also includes providing parents with information regarding health and wellness, the district's policy and plan, activities, involvement opportunities, school meal standards and available child nutrition programs. This information will be communicated through a variety of methods, including publication in newsletters and on the website, at enrollment, back to school nights and similar activities.

School Meals

The district participates in the following USDA child nutrition programs:

- National School Lunch Program (NSLP)
- School Breakfast Program (SBP)

Participation in these programs is designed to ensure students receive plenty of fruits, vegetables, whole grains, and fat free/low-fat milk to meet their nutrition needs. School meals are also calorically appropriate, moderate in sodium, low in saturated fat and have zero grams of trans fat.

Goals of the district's meal program include:

- Improving overall health
- Mitigating childhood obesity
- Modeling healthy eating in support of lifelong eating patterns
- Accommodating cultural food preference and special dietary needs

School meals:
• Are accessible to all students
• Are appealing and attractive to children
• Are served in clean and pleasant settings
• Meet or exceed current nutrition requirements established by local, state, and federal statutes and regulations
• Promote healthy food and beverage choices by:
  
  o Displaying whole fruit options in attractive bowls or baskets
  o Making sliced or cut fruit available
  o Displaying daily fruit options in students' line of sight/reach
  o Creatively naming vegetable options
  o Bundling daily vegetable options into all grab and go meals
  o Training servers to politely prompt students to select and consume the daily vegetable options with their meal
  o White milk is placed in front of other beverages in coolers
  o Creating a reimbursable meal in all service areas
  o Student surveys and taste testing opportunities are used to inform menu development
  o Student artwork is displayed in the service and/or dining areas
  o Students bringing their own lunch may not bring sodas or energy drinks
  o A nutrient analysis of school meals will be available upon request

Qualifications and Training

All school nutrition employees will meet or exceed USDA hiring and annual continuing education/training requirements.

Water

To promote hydration, free, safe, unflavored drinking water will be available to all students throughout the school day, including during mealtimes.

Competitive Foods and Beverages

Foods and beverages sold or offered apart from the school meal programs (competitive items) will, at a minimum, meet the USDA Smart Snacks in School standards. Competitive items at celebrations and parties are not required to meet USDA Smart Snacks in School standards, although the District School Nurse is responsible for annually disseminating healthy and non-food party ideas to teachers, who will provide this information to parents who are bringing classroom snacks.

No food or beverage will be withheld as a punishment, unless specified in a qualified student's IEP.

Fundraising
Competitive items may be sold during the school day as a fundraiser as long as those items meet USDA Smart Snacks in School standards.

Any site wishing to conduct fundraisers which are exempt from the Smart Snacks in School standards must follow the procedures and standards established by the Oklahoma State Department of Education. This includes designating a contact person to oversee and document the exempt fundraisers. The principals at each building will oversee these fundraisers.

No exempt fundraiser may continue for more than fourteen (14) days or be conducted while school meals or snacks are being served. No more than thirty (30) exempt fundraisers may be held per site per semester. For purposes of this policy, fundraisers include, but are not limited to, activities such as vending machines, snack shops, student stores, etc.

The site coordinator must maintain documentation related to all exempt fundraisers, including, but not limited to, the organization, activity, class, or group benefiting from the fundraiser, as well as the dates of the fundraiser. The site coordinator must also provide information regarding exempt fundraisers to the District School Nurse.

The District School Nurse will annually provide staff and PTA representatives a list of healthy fundraising ideas.

Health and Nutrition Education

Good nutrition will be encouraged throughout the school day using evidence-based techniques, including creative marketing for nutritious food choices. This will create a food environment which encourages healthy eating and participation in school meal programs. Wellness committee employees and child nutrition workers will regularly consult federal and state resources for current tips and resources to implement these requirements.

The district's nutrition education will:
• Provide knowledge and skills so students can protect their health
• Be integrated across disciplines
• Be enjoyable, developmentally appropriate, and culturally relevant
• Promote nutritious foods and preparation methods
• Emphasize caloric balance (promote exercise)
• Coordinate with school meal and other relevant programs
• Teach media literacy related to food/beverage marketing

The district's health education curriculum will include:
• The relationship between eating, personal health and disease
• Food guidance from MyPlate
• Reading and using USDA's food labels
• Eating a variety of foods every day
• Balancing food intake and physical activity
• Eating more fruits, vegetables, and whole grain products
Choosing foods that are low in fat, saturated fat, and cholesterol and do not contain trans-fat
Choosing foods and beverages with little added sugars
Eating more calcium-rich foods
Preparing healthy meals and snacks
Risks of unhealthy weight control practices
Accepting body size differences
Food safety
Importance of water consumption
Importance of eating breakfast
Making healthy choices when eating at restaurants
Eating disorders
The Dietary Guidelines for Americans
Reducing sodium intake
Social influences on eating, including media, family, peers, and culture
How to find valid nutrition and dietary information
How to develop a plan and track progress toward achieving a personal goal to eat healthfully
Resisting peer pressure related to unhealthy dietary behavior
Influencing, supporting, or advocating for others' healthy behavior

Advertising

In order to provide a consistent message for students, only those foods and beverages which meet USDE Smart Snacks in School standards may advertise on district property during school hours.

This includes:

- Brand names, trademarks, logos or tags, except when placed on a physically present food or beverage product or its container
- Displays, such as on vending machine exteriors
- Corporate brand, logo, name, or trademark on school equipment, such as marquees, message boards, scoreboards, or backboards (Note: the district will not immediately replace existing items, but will not accept or allow new items which violate this policy)
- Corporate brand, logo, name, or trademark on cups, menu boards, coolers, trash cans, and other food service equipment; as well as on posters, book covers, assignment books, or school supplies displayed, distributed, offered, or sold by the district
- Advertisements in school publications or mailings
- Free product samples, taste tests, or coupons of a product, or free samples displaying advertising of a product

Physical Activity

All schools will make a variety of physical activity available throughout the school day and will also seek opportunities to provide afterschool physical activities. The district's physical activities include PE classes, recess, classroom based physical activity and after school activities. Withholding Physical activity, including recess, as a punishment will be discouraged. This does not include participation in extracurricular activities which are privilege
based. The district will maintain safe and appropriate grounds and facilities to promote active students.

Physical Education Classes

All district students, except those excused due to medical necessity, will participate in age-appropriate, sequential PE classes as required by state and federal curriculum standards. Students will also participate in state and/or federal assessments which promote fitness.

Health Education - Physical Activity

The following topics will be included in the district's health education curriculum:

- The physical, psychological, or social benefits of physical activity
  - How physical activity can contribute to a healthy weight
  - How physical activity can contribute to the academic learning process
  - How an inactive lifestyle contributes to chronic disease
  - Health-related fitness (cardiovascular endurance, muscular endurance, muscular strength, flexibility, and body composition)
  - Differences between physical activity, exercise, and fitness
  - Phases of an exercise session (warm up, workout, and cool down)
  - Overcoming barriers to physical activity
  - Decreasing sedentary activities, such as TV watching
  - Opportunities for physical activity in the community
  - Preventing injury during physical activity
  - Weather-related safety (e.g., avoiding heat stroke, hypothermia, and sunburn while being physically active)
  - How much physical activity is enough (determining frequency, intensity, time, and type of physical activity)
  - Developing an individualized physical activity and fitness plan
  - Monitoring progress toward reaching physical activity plan goals
  - Dangers of using performance-enhancing drugs, such as steroids
  - Social influences on physical activity (media, family, peers, culture)
  - How to find valid fitness information or services
  - How to influence, support, or advocate for others' physical activity
  - How to resist peer pressure that discourages physical activity

Recess (Elementary School Students)

All elementary sites will offer at least twenty (20) minutes of recess every school day, except when early dismissal or similar scheduling requirements make this impractical. Recess is separate from PE classes.

Time for hand washing, putting away coats, etc. will be built into recess transition periods to ensure students have adequate time for both recess and eating. For classes who participate in
recess prior to lunch, adequate hand washing facilities will be readily available to ensure proper
hygiene prior to eating.

Recess will be outside unless weather or other emergency conditions make this inadvisable. If
recess is conducted inside, efforts will be made to promote physical activity during recess. This
includes activities such as shared gymnasium time, walking in the hallways, classroom physical
activity videos.

Recess monitors will encourage students to be active and will serve as role models by being
physically active alongside students when practical.

Physical Activity in the Classroom

To increase attention to learning and to promote wellness, all students will be provided with
brief, periodic activity breaks for stretching. Movement and kinesthetic learning will be
routinely incorporated into lessons for all subjects.

Before and After School Activities

The district's after school program will provide opportunities for students to engage in physical
activity when possible. The district sponsors a variety of clubs and physical activities at each
site. Information regarding these opportunities will be provided to students and families in a
timely manner based on the nature of the activity.

Active Transport

The district supports active transport (walking, biking, etc.) to and from school when it is safe to
do so.

Other Activities to Promote Wellness

The district's wellness approach will be integrated across the entire school setting, including all
school sponsored events.

All school-sponsored wellness events will include physical activity opportunities. The district
will also seek opportunities to partner with the community in support of this program. The
District School Nurse is responsible for evaluating proposed partnerships, sponsors and activities
to ensure that they comply with the district's wellness objectives.

The district is required to make this policy inform the public about the content of this policy and
any updates to the policy on an annual basis. The district may do this electronically or through
the media.
